

North Airfield Drive Gateway Bridge at DFW International Airport

Dallas/Fort Worth, TX

Type: **Steel Arches**
Services: **Preliminary and Final Design**
Cost: **\$30 Million**
Completion Date: **N/A**
Client: **Dallas Fort Worth
International Airport
2400 Aviation Drive
DFW Airport, TX 75261**

The new gateway arch bridge at the Dallas Fort Worth International Airport will replace the existing North Airfield Drive Bridge. The new signature bridge consisting of two major arches and smaller connecting arch will announce the entrance to airport from a distance and give new identity to the airport overall property. The bridge design will also include a striking lighting system and monumental signage that will complement the airport's identity, graphic and color standards.
